CLOUD ENGINEER

The Cloud Engineering role at Octavian Technology Group collaborates with clients to understand their business challenges, and crafts appropriate solutions with limited direction. Cloud Engineering responsibilities include the ability to execute projects with Agile methodologies such as Scrum and Kanban, the capability to build design application and solutions targeting cloud PaaS and FaaS, as well as the ability to work with REST Services, SOA, Microservices, and other common Architectures. This is a remote position and pay is negotiable based on experience.

About Octavian Technology Group: Founded in 2019, Octavian Technology Group prides itself on being able to provide great opportunities for consulting technologists to flourish. Our focus is to make the companies we work with stronger, more successful, and competitive.

We are looking for humble, hungry, and team conscious individuals that excel at working together while leading by example. We are looking for people that are smart, get things done, and share our passion of giving back to the community. Our culture is casual but professional, serious but light-hearted. We believe in promoting diversity, inclusion and putting our employees first.
